PROFESSIONAL SUMMARY

Software Engineer with **3+ years** of full-time experience and a rigorous 2-year technical internship, specializing in building scalable enterprise web applications. Deep expertise in **Angular architectures**, alongside **React** and modern JavaScript. Proven track record of modernizing legacy systems, leading **micro-frontend migrations**, and driving accessibility compliance to **95%**. Highly efficient at rapid feature delivery by leveraging advanced Bash scripting, terminal workflows, and integrating AI-assisted tooling (**Claude Code, GitHub Copilot, AI DLC**) under strict architectural oversight.

TECHNICAL SKILLS

Frameworks & Languages: Angular, React, JavaScript (ES6+), TypeScript, React Native, HTML5, CSS3, SCSS/SASS
Architecture & State: Micro-frontends, Elf, Akita, NgRx, Redux, Zustand, RxJS, RESTful APIs
Workflow & Terminal: Advanced Bash Scripting, Terminal Workflows, Git/GitHub, Webpack, Jenkins, Bitbucket
AI & Methodologies: AI DLC, GitHub Copilot, Claude Code, Agentic Workflows, Agile/Scrum, TDD, Design Systems
Testing & Standards: ARIA Accessibility, Jest, Cypress, Mocha, Testing Library

PROFESSIONAL EXPERIENCE

Software Engineer 2 - Frontend | ModMed Hyderabad, India | Sep 2025 – Present

- Developed and maintained an **Angular**-based digital health application for end-to-end patient and practice workflows, managing secure clinical data.
- Migrated a legacy **AngularJS (Angular 1)** architecture to **Angular 14**, modernizing the codebase and significantly reducing maintenance risk across core modules.
- Architected and delivered a complex issue-selection feature for a **React**-based patient check-in flow within the first week of joining.
- Audited and resolved accessibility gaps across priority screens, improving ARIA usage, keyboard navigation, and contrast to achieve **95% compliance**.
- Accelerated development cycles and slashed defect resolution times by leveraging advanced terminal diagnostics and AI-assisted workflows, ensuring high availability for mission-critical clinical features.

Software Engineer - Frontend | ThoughtWorks Bengaluru, India | Jul 2023 – Sep 2025

- Engineered The SmartOffice Portal, an **Angular**-based enterprise web application for centralized and secure device management.
- Co-led a complex **micro-frontend migration** and state management modernization from Akita to **Elf**, enabling the team to ship **3 independent releases** per quarter.
- Built a reusable, accessible design system delivering 25+ **ARIA-compliant** responsive components with high cross-browser fidelity.
- Integrated REST APIs with **Axios** and **RxJS**, improving error handling parameters to drastically reduce failure rates in mission-critical user journeys.
- Organized and led technical workshops on Angular, Atomic Design, and Elf, accelerating new-hire ramp-up; served as primary UI reviewer across **200+ PRs**.

STEP Intern | ThoughtWorks Bengaluru, India | Feb 2021 – Jul 2023

- Mastered modern web fundamentals, **Agile/Scrum** methodologies, and **Test-Driven Development (TDD)** through an intensive, multi-year training program.
- Achieved **95% code coverage** using **Jest** across multiple feature deployments, enforcing strict code quality and reliability standards early in the lifecycle.
- Built a **Unity**-based Model Viewer for Lenovo **AR Glass**, enabling real-time rendering and seamless interaction with complex 3D device models.
- Implemented "AppCast" functionality, successfully streaming the AR headset's view to mobile devices for remote client demos and troubleshooting.

EDUCATION

Bachelor of Computer Application (BCA) Alagappa University, Karaikudi	7.1/10
Diploma in Computer Science Aditya University, Surampalem	85.6%
