PROFESSIONAL SUMMARY

Frontend engineer with 3+ years of professional experience building React and Angular applications with TypeScript, plus a 2-year STEP engineering program at ThoughtWorks. Experience spans React and Redux healthcare workflows, Angular modernization, micro-frontends, design systems, accessibility, state management, and REST API integration.

TECHNICAL SKILLS

Frontend	React, Angular 14+, TypeScript, JavaScript ES6+, RxJS, HTML5, CSS3, SCSS/SASS, Tailwind CSS
React	Hooks, Redux Toolkit, RTK Query, React Router, React Hook Form, Zustand, Context API, component composition
Angular	Components, services, routing, forms, RxJS, NgRx, Akita, Elf, AngularJS to Angular migration
Architecture & Standards	Micro-frontends, Module Federation, component libraries, design systems, PWAs, responsive UI, Figma-to-code, WCAG 2.1, ARIA
Backend & Data	Node.js, Java, REST APIs, MongoDB, IndexedDB, database migrations, Axios, API integration
Testing	Jest, Vitest, Cypress, Mocha, Testing Library, TDD
Tools & Automation	Git, GitHub, Bitbucket, Webpack, Vite, Playwright, Docker, Jenkins, CI/CD, Bash scripting, shell automation, GitHub Copilot, Claude Code
Desktop & XR	Electron, Unity, AR/VR/XR workflows, real-time 3D model viewing

PROFESSIONAL EXPERIENCE

Software Engineer 2 - Frontend - ModMed, Hyderabad

Sep 2025 - Present

- Delivered an issue-selection workflow for a React and Redux patient check-in product, integrating shared application state, design-system components, and internal APIs.
- Migrated a legacy data-integration layer to RTK Query, replacing custom request and caching logic with shared query endpoints and standard loading and error states.
- Implemented Redux state for conditional routing, back and resume behavior, and persistence across the multi-step patient intake flow.
- Resolved accessibility issues across priority screens by correcting ARIA semantics, color contrast, and keyboard interactions.
- Migrated a clinical feature module from AngularJS to Angular 14 while retaining its existing workflow behavior.

Software Engineer - Frontend - ThoughtWorks, Bengaluru

Jul 2023 - Sep 2025

- Developed the SmartOffice Portal, an Angular and TypeScript application for secure device management across multiple organizations.
- Co-led a migration to micro-frontends and moved state management from Akita to Elf, enabling 3 independent releases per quarter.
- Built 25+ responsive, ARIA-compliant components and design-system patterns adopted by 5+ teams across enterprise workflows.
- Reviewed 200+ PRs as primary UI reviewer, led workshops on Angular and frontend state management, and supported new-hire onboarding.
- Implemented REST API integrations and multi-form validation using Angular, RxJS, Axios, Java, and MongoDB.

STEP Intern - ThoughtWorks, Bengaluru

Feb 2021 - Jul 2023

- Completed an intensive engineering program covering modern web fundamentals, Agile/Scrum delivery, and Test-Driven Development.
- Built a Unity-based Model Viewer for Lenovo AR Glass, enabling real-time rendering and interaction with 3D device models.
- Implemented AppCast functionality to stream the AR headset view to mobile devices for remote demonstrations and troubleshooting.
- Added Jest tests for feature releases, covering core behavior and regression paths.

SELECTED PROJECTS

ActionKit - React library

github.com/saicharanar/actionkit

- Published react-actionkit to npm, providing typed action registration, command-palette search, persistent keyboard-shortcut overrides, React 18/19 support, and Vitest tests.

Anchor - Local-first React PWA

github.com/saicharanar/anchor

- Built an installable, offline-first planning PWA using React, TypeScript, Zustand, and IndexedDB for tasks, routines, goals, expenses, insights, and JSON import/export without requiring an account or server.

Relay - Electron + React desktop app

github.com/saicharanar/relay

- Built and packaged a macOS menu-bar app with Electron, React, and TypeScript to monitor GitHub Actions across repositories, using API polling, aggregate tray status, and encrypted token storage.

Glide - Node.js + TypeScript CLI

github.com/saicharanar/glide

- Built a Node.js and TypeScript CLI that drives Chromium through Playwright to auto-scroll and record WebM product walkthroughs, with configurable viewports, browser discovery, and live progress reporting.

EDUCATION

Bachelor of Computer Application - Alagappa University, Karaikudi

2023

Diploma in Computer Science - Aditya University, Surampalem

2020 - 85.6%
